

Call for Papers

<http://www.critis2015.org>

In 2015, the **International Conference on Critical Information Infrastructures Security** faces its **tenth anniversary**. CRITIS 2015 continues the tradition of presenting innovative research and exploring new challenges in the field of critical (information) infrastructures protection (C(I)IP) and fostering the dialogue with stakeholders. CRITIS 2015 aims at bringing together **researchers** and **professionals** from **academia**, **industry** and **governmental organisations** working in the field of the security of critical (information) infrastructure systems.

As in previous years, **invited speakers** and special events will complement a **programme of original contributions**. The conference invites the different research communities and disciplines involved in the C(I)IP space, and encourages discussions and multi-disciplinary approaches to relevant C(I)IP problems.

CRITIS 2015 has four foci. Topic category 1, Resilience and protection of cyber-physical systems, covers advances in the classical CIIP sectors telecommunication, cyber systems and electricity infrastructures. Topic category 2 focuses on advances in C(I)IP policies and best practices in C(I)IP specifically from stakeholders' perspectives. In topic category 3, general advances in C(I)IP, we are explicitly inviting contributions from additional infrastructure sectors like energy, transport, and smart built infrastructure) and cover also cross-sector CI(I)P aspects.

In 2013, the CRITIS series of conferences has started to foster **contributions from young experts and researchers** ("Young CRITIS"), and in 2014 this has been reinforced by the first edition of the CIPRNet Young CRITIS Award (CYCA). As a fourth focus, we will continue both activities at CRITIS 2015, since our demanding multi-disciplinary field of research requires open-minded talents.

For these four focal areas (details see <http://www.critis2015.org>), **we are looking for** high-calibre original research contributions from the entire CIP/CIIP domain, including contributions from young researchers, as well as original contributions on C(I)IP policies and best practices in C(I)IP from a stakeholders' perspectives.

Submissions will be done via EasyChair. As in previous years, we plan to publish a **post-proceedings** volume in Springer's LNCS series. Please find the **acceptance and publishing policy** and other details on the conference website <http://www.critis2015.org>.

Important Dates

Submission of full papers: May 10, 2015 (firm!)
 Notification of acceptance: July 8, 2015
 Camera-ready papers: September 10, 2015
 CRITIS 2015 event: October 5–7, 2015

Venue

Fraunhofer Forum
 Anna-Louisa-Karsch-Str. 2
 10178 Berlin
 Germany

Chairs

General Chair

Erich Rome, Fraunhofer IAIS

Programme Co-Chairs

Stephen D. Wolthusen, Royal Holloway, UK, and Gjøvik College, Norway
 Marianthi Theodoridou, EU Joint Research Centre, IPSC

Publicity Chair

Cristina Alcaraz, University of Malaga, Spain

CRITIS steering committee chairs

Javier Lopez, University of Malaga, Spain
 Bernhard M. Hämmerli, TU Lucerne and ACRIS GmbH, Switzerland
